1 Weekly Summary

AI-Generated Content

The summary below was written by Claude (Anthropic) from that week's regression outputs and series descriptions. It has not been reviewed or fact-checked by a human, and should be read as an automated, informal recap – not analysis.

Welcome back to the weekly ritual where we throw two unrelated economic series into a blender and act surprised by whatever sludge comes out. This week the dartboard served up some truly inspired matchups, and I am thrilled to report that at least one of them survived contact with reality. Only one. Expectations: appropriately subterranean.

Monday kicked off with the OMX Copenhagen Alternative Energy Price Index facing down a discontinued OECD recession indicator for Poland, because nothing says "rigorous science" like regressing Danish solar stocks against a binary flag for Polish recessions that stopped updating in 2022. The raw regression coughed up a p-value with forty-some zeroes after the decimal point, which sounds impressive until you notice the R-squared is a whopping six percent. And here is the genuinely surprising part: the detrended version actually got slightly stronger instead of collapsing. Seven percent R-squared, still absurdly "significant." Now, before anyone drafts a thesis titled "Copenhagen Clean Energy as a Leading Indicator of Polish Economic Doom," let me remind you that explaining seven percent of anything is the statistical equivalent of showing up to a marathon and jogging to the mailbox. It holds up better than the usual trend mirage, sure, but "better than garbage" is not "good."

Tuesday mercifully restored order to the universe. We paired a motor vehicle electronics export price index against foreign net transactions of U.S. long-term agency bonds by Chile – a crossover event nobody asked for – and the result was a magnificent, resounding nothing. Raw p-value of 0.43, detrended p-value of 0.90, an R-squared so small it rounds to the number of friends this project has made. This is the correlation machine working exactly as intended: two random series, zero relationship, no drama. Chef's kiss.

Then Wednesday had to go and get interesting. Consumer motor vehicle leases owned by finance companies versus mortgage-backed securities held by foreign-related institutions posted a raw R-squared of 0.81, which in this project is roughly a religious experience. And unlike your typical shared-trend fireworks that evaporate the instant you detrend them, this one held onto a very respectable 0.44 after stripping out the time trends. That is the rare "huh, maybe something real is going on here" outcome – both are big dollar-denominated financial balances that plausibly breathe with the same credit cycle, so I'll allow a single raised eyebrow. One. That said, please recall the ironclad house rule: these are randomly paired series, I am making no causal claim, and spurious correlation is the default setting of this entire operation. A strong number here means "pay attention," not "rearrange your portfolio around leased minivans." See you next week for more premium nonsense.

2 Date: 2026-10-26

Series ID: NASDAQCX601020PI
This series is titled OMX Copenhagen Alternative Energy Price Index and has a frequency of Daily. The units are Index and the seasonal adjustment is Not Seasonally Adjusted.The observation start date is 2008-12-30 and the observation end date is 2026-10-23.The popularity of this series is 1.

Series ID: POLRECDM
This series is titled OECD based Recession Indicators for Poland from the Peak through the Trough (DISCONTINUED) and has a frequency of Daily, 7-Day. The units are +1 or 0 and the seasonal adjustment is Not Seasonally Adjusted.The observation start date is 1995-02-01 and the observation end date is 2022-08-31.The popularity of this series is 1.

2.1 Raw Regression

Regresses the two series against each other directly. A significant result here can come just as easily from both series sharing a long-run trend as from any real relationship.

Dep. Variable:	value_fred_POLRECDM	**R-squared:**	0.057
Model:	OLS	**Adj. R-squared:**	0.057
Method:	Least Squares	**F-statistic:**	206.4
Date:	Mon, 26 Oct 2026	**Prob (F-statistic):**	1.74e-45
Time:	17:43:09	**Log-Likelihood:**	-2167.1
No. Observations:	3419	**AIC:**	4338.
Df Residuals:	3417	**BIC:**	4351.
Df Model:	1		
Covariance Type:	nonrobust		

	coef	**std err**	**t**	**P> |t|**	**[0.025**	**0.975]**
const	0.4795	0.013	36.620	0.000	0.454	0.505
value_fred_NASDAQCX601020PI	-4.034e-05	2.81e-06	-14.366	0.000	-4.58e-05	-3.48e-05

Omnibus:	47995.954	**Durbin-Watson:**	0.009
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	514.195
Skew:	0.676	**Prob(JB):**	2.21e-112
Kurtosis:	1.665	**Cond. No.**	7.83e+03

Notes:
[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.
[2] The condition number is large, 7.83e+03. This might indicate that there are
strong multicollinearity or other numerical problems.

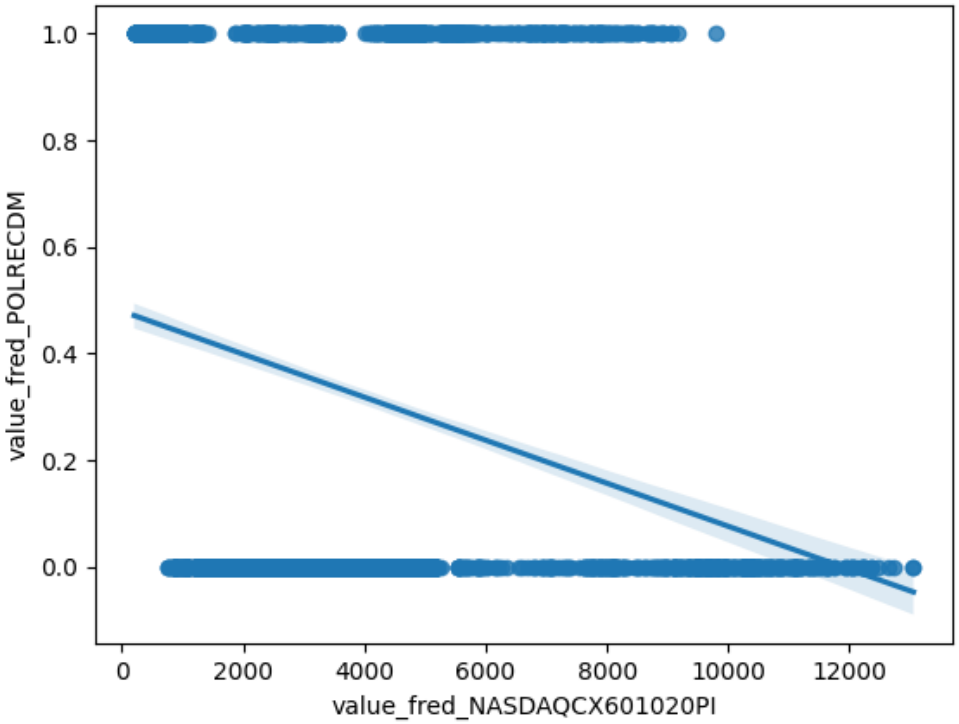

Figure 1: Raw Regression Plot for 2026-10-26

2.2 Detrended Regression

Regresses the residuals of each series after removing its own linear time trend, so a shared trend can no longer drive the result on its own. A relationship that stays significant here is better evidence of a genuine link between the two series.

Dep. Variable:	value_fred_POLRECDM_detrended	**R-squared:**	0.071
Model:	OLS	**Adj. R-squared:**	0.071
Method:	Least Squares	**F-statistic:**	262.7
Date:	Mon, 26 Oct 2026	**Prob (F-statistic):**	5.73e-57
Time:	17:43:09	**Log-Likelihood:**	-2123.7
No. Observations:	3419	**AIC:**	4251.
Df Residuals:	3417	**BIC:**	4264.
Df Model:	1

Omnibus:	113787.732	**Durbin-Watson:**	0.009
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	482.553
Skew:	0.631	**Prob(JB):**	1.64e-105
Kurtosis:	1.660	**Cond. No.**	1.66e+03

Notes:

[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.

[2] The condition number is large, 1.66e+03. This might indicate that there are strong multicollinearity or other numerical problems.

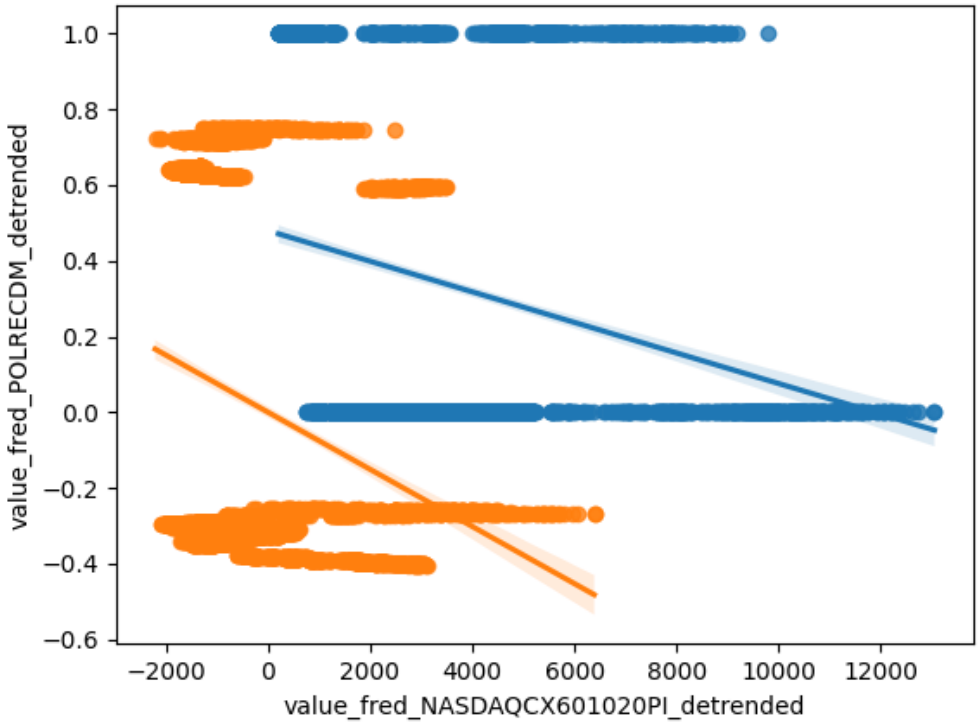

Figure 2: Detrended Regression Plot for 2026-10-26

3 Date: 2026-10-27

Series ID: IY33632

This series is titled Export Price Index (NAICS): Motor Vehicle Electrical and Electronic Equipment Manufacturing and has a frequency of Monthly. The units are Index Dec 2008=100 and the seasonal adjustment is Not Seasonally Adjusted.The observation start date is 2008-12-01 and the observation end date is 2026-09-01.The popularity of this series is 1.

Series ID: FORLTAGCYNET30406

This series is titled Foreign Net Transactions of U.S. Long-Term Agency Bonds: Chile and has a frequency of Monthly. The units are Millions of Dollars and the seasonal adjustment is Not Seasonally Adjusted.The observation start date is 1985-01-01 and the observation end date is 2026-08-01.The popularity of this series is 1.

3.1 Raw Regression

Regresses the two series against each other directly. A significant result here can come just as easily from both series sharing a long-run trend as from any real relationship.

Dep. Variable:	value_fred_FORLTAGCYNET30406	**R-squared:**	0.003
Model:	OLS	**Adj. R-squared:**	-0.002
Method:	Least Squares	**F-statistic:**	0.6151
Date:	Tue, 27 Oct 2026	**Prob (F-statistic):**	0.434
Time:	20:06:38	**Log-Likelihood:**	-1228.3
No. Observations:	212	**AIC:**	2461.
Df Residuals:	210	**BIC:**	2467.
Df Model:	1		
Covariance Type:	nonrobust		

	coef	**std err**	**t**	**P> |t|**	**[0.025**	**0.975]**
const	76.4398	92.089	0.830	0.407	-105.098	257.978
value_fred_IY33632	-0.7484	0.954	-0.784	0.434	-2.630	1.133

Omnibus:	296.720	**Durbin-Watson:**	2.046
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	32875.754
Skew:	6.102	**Prob(JB):**	0.00
Kurtosis:	62.773	**Cond. No.**	1.62e+03

Notes:

[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.

[2] The condition number is large, 1.62e+03. This might indicate that there are strong multicollinearity or other numerical problems.

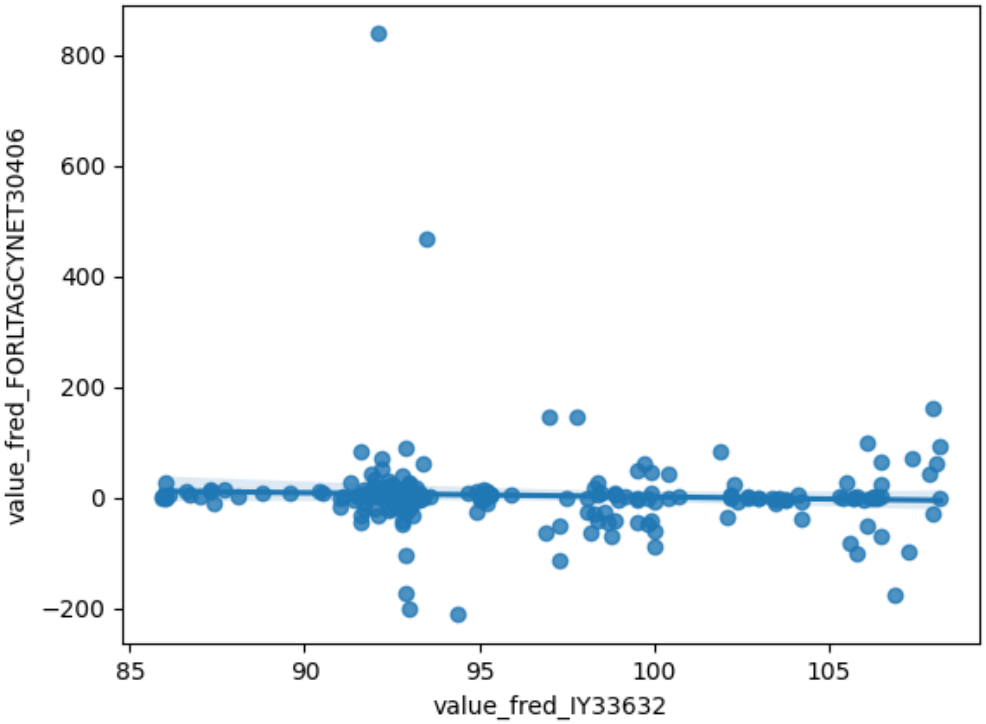

Figure 3: Raw Regression Plot for 2026-10-27

3.2 Detrended Regression

Regresses the residuals of each series after removing its own linear time trend, so a shared trend can no longer drive the result on its own. A relationship that stays significant here is better evidence of a genuine link between the two series.

Dep. Variable:	value_fred_FORLTAGCYNET30406_detrended	**R-squared:**	0.000
Model:	OLS	**Adj. R-squared:**	-0.005
Method:	Least Squares	**F-statistic:**	0.01566
Date:	Tue, 27 Oct 2026	**Prob (F-statistic):**	0.901
Time:	20:06:39	**Log-Likelihood:**	-1228.1
No. Observations:	212	**AIC:**	2460.
Df Residuals:	210	**BIC:**	2467.
Df Model:	1		
Covariance Type:	nonrobust		

	coef	**std err**	**t**	**P> |t|**	**[0.025**	**0.975]**
const	1.565e-12	5.476	2.86e-13	1.000	-10.794	10.794
value_fred_IY33632_detrended	-0.1687	1.348	-0.125	0.901	-2.825	2.488

Omnibus:	295.354	**Durbin-Watson:**	2.049
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	32265.413
Skew:	6.055	**Prob(JB):**	0.00
Kurtosis:	62.212	**Cond. No.**	4.06

Notes:

[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.

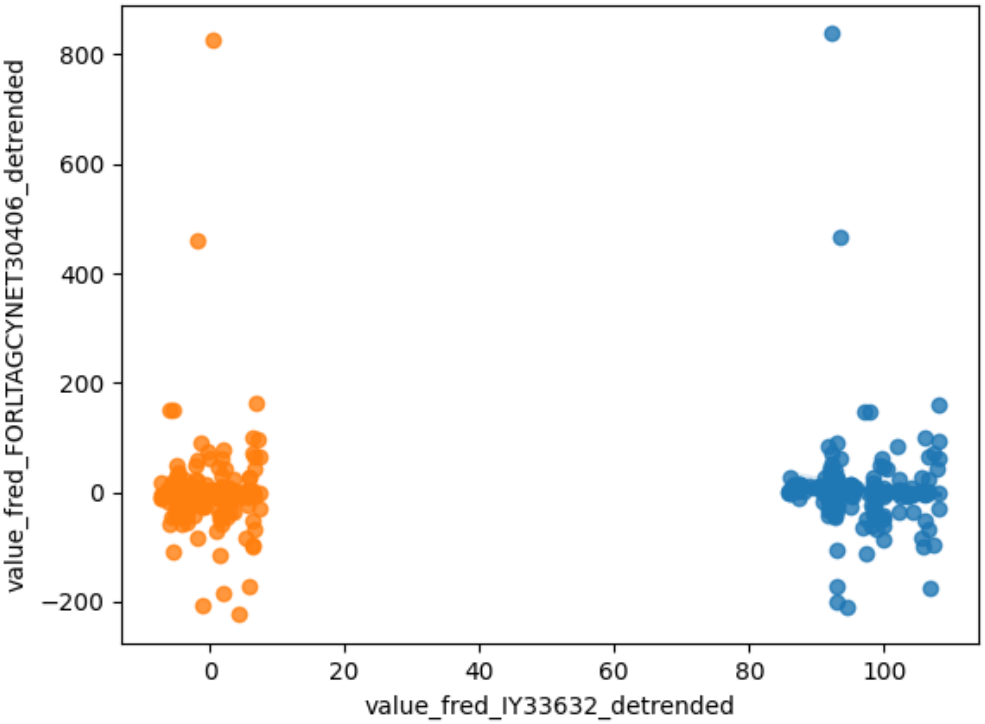

Figure 4: Detrended Regression Plot for 2026-10-27

4 Date: 2026-10-28

Series ID: DTCORVHFNM
This series is titled Consumer Motor Vehicle Leases Owned by Finance Companies, Level and has a frequency of Monthly. The units are Millions of Dollars and the seasonal adjustment is Not Seasonally Adjusted.The observation start date is 1980-06-01 and the observation end date is 2026-07-01.The popularity of this series is 13.

Series ID: OMBFRIM027SBOG
This series is titled Other Securities: Mortgage-Backed Securities, Foreign-Related Institutions and has a frequency of Monthly. The units are Billions of U.S. Dollars and the seasonal adjustment is Seasonally Adjusted.The observation start date is 2009-07-01 and the observation end date is 2026-09-01.The popularity of this series is 1.

4.1 Raw Regression

Regresses the two series against each other directly. A significant result here can come just as easily from both series sharing a long-run trend as from any real relationship.

Dep. Variable:	value_fred_OMBFRIM027SBOG	**R-squared:**	0.811
Model:	OLS	**Adj. R-squared:**	0.810
Method:	Least Squares	**F-statistic:**	872.2
Date:	Wed, 28 Oct 2026	**Prob (F-statistic):**	2.03e-75
Time:	17:29:33	**Log-Likelihood:**	-373.28
No. Observations:	205	**AIC:**	750.6
Df Residuals:	203	**BIC:**	757.2
Df Model:	1		
Covariance Type:	nonrobust		

	coef	**std err**	**t**	**P> |t|**	**[0.025**	**0.975]**
const	17.1997	0.459	37.497	0.000	16.295	18.104
value_fred_DTCORVHFNM	-7.456e-05	2.52e-06	-29.533	0.000	-7.95e-05	-6.96e-05

Omnibus:	20.349	**Durbin-Watson:**	0.152
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	23.791
Skew:	0.816	**Prob(JB):**	6.82e-06
Kurtosis:	2.650	**Cond. No.**	7.94e+05

Notes:
[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.
[2] The condition number is large, 7.94e+05. This might indicate that there are strong multicollinearity or other numerical problems.

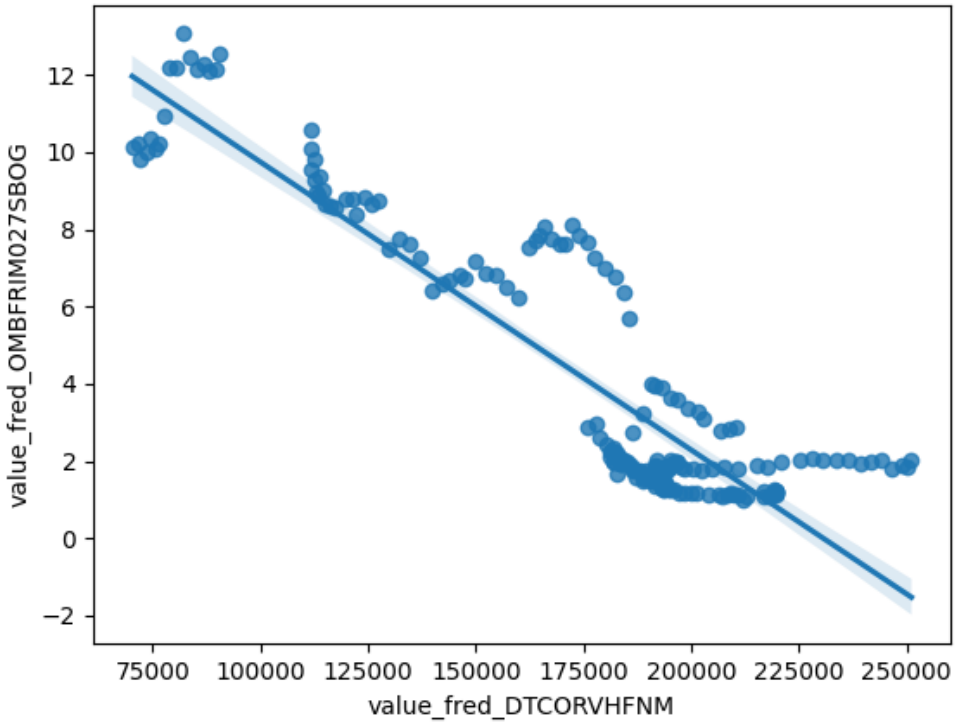

Figure 5: Raw Regression Plot for 2026-10-28

4.2 Detrended Regression

Regresses the residuals of each series after removing its own linear time trend, so a shared trend can no longer drive the result on its own. A relationship that stays significant here is better evidence of a genuine link between the two series.

Dep. Variable:	value_fred_OMBFRIM027SBOG_detrended	**R-squared:**	0.445
Model:	OLS	**Adj. R-squared:**	0.442
Method:	Least Squares	**F-statistic:**	162.8
Date:	Wed, 28 Oct 2026	**Prob (F-statistic):**	9.21e-28
Time:	17:29:33	**Log-Likelihood:**	-348.91
No. Observations:	205	**AIC:**	701.8
Df Residuals:	203	**BIC:**	708.5
Df Model:	1		
Covariance Type:	nonrobust		

	coef	**std err**	**t**	**P> |t|**	**[0.025**	**0.975]**
const	-1.902e-12	0.093	-2.04e-11	1.000	-0.184	0.184
value_fred_DTCORVHFNM_detrended	-5.049e-05	3.96e-06	-12.759	0.000	-5.83e-05	-4.27e-05

Omnibus:	22.829	**Durbin-Watson:**	0.125
Prob(Omnibus):	0.000	**Jarque-Bera (JB):**	8.351
Skew:	0.217	**Prob(JB):**	0.0154
Kurtosis:	2.112	**Cond. No.**	2.35e+04

Notes:

[1] Standard Errors assume that the covariance matrix of the errors is correctly specified.

[2] The condition number is large, 2.35e+04. This might indicate that there are strong multicollinearity or other numerical problems.
